

## Track 1: Smart Cities – Session 1c

### *How will we live together in the future?*

From health and lifestyle to building and living, digital offers and solutions are becoming a substantial part of urban life. However, it's not just about technology and efficiency. Cities need good architecture across the board and liveable public and private outdoor spaces. These include markets and marketplaces, as well as recreational and creative spaces.

#### **Moderator:**

**Anne Beer, Prof.**, East Bavarian Technical University of Regensburg (OHG) and Beer Bembé Dellinger Architects
